Projecting Displays on the Big Screen

Displays from the *Mediasonic DVD Player*, the **Booth Laptop**, the **Booth Tower Computer**, computers connected to the external HDMI wall jacks, or the *Program display of the V800* can be projected on the **Big Screen**.

Figure 1: The Blackmagic ATEM.

Figure 1 shows the Blackmagic ATEM front panel. It is located below the Multiview monitor as seen in Figure 2.

- ➢ When an input button is selected the button will turn green and, that source will appear in the Preview display on the Multiview monitor.
- ➢ The red button is the current Program source.
- ➢ Pressing either the **Cut** or **Auto** buttons on the Blackmagic ATEM will move the Preview source to Program.

Figure 2: The ATEM and multiview monitor.

Projecting a DVD

Figure 3 shows the **Mediasonic DVD Player**. It is located below the switches for the wireless microphones.

In Figure 2, the Mediasonic is shown in position #3 in the **Multiview monitor**.

When the Mediasonic DVD player is turned on it will appear as a video device on the Blackmagic ATEM multiview display.

Figure 3: The Mediasonic player.

> DVDs and CD's can be played on the Mediasonic DVD Player, the Booth Laptop computer, the Booth Tower computer, or computers connected to the external HDMI wall jacks.

> **WARNING**: Always use the **OPEN/CLOSE** switch on the Mediasonic player. Forcing the player tray to close by pressing on the tray is likely to damage the mechanism and destroy the player.

Figure 3 shows the Mediasonic DVD Player. It is located below the switches for the wireless microphones.

✔ To send the **Mediasonic** player video to the **Preview** display, press the appropriate switch (#3) on the Blackmagic ATEM.

This will send it to **Preview** on the Multiview monitor.

Figure 4: The Blackmagic ATEM.

✔ Press the **Cut** (or **Auto**) button on the Blackmagic ATEM. (See Figure 4)

This moves the Mediasonic **Preview** display to **Program** on the Multiview display.

The Blackmagic ATEM *Program* output is sent to the *Projector*.

✔ Adjust the sound volume using the appropriate input on the Sound Board.

> (NOTE: The Blackmagic ATEM Program output also is sent to Channel 6 of the V800 video mixer.)

Projecting the Booth Tower Computer Display

✔ To send the Booth Tower Computer display to the Program output, press the appropriate switch (#8) on the Blackmagic ATEM.

This will send it to **Preview** on the Multiview monitor.

✔ Press the **Cut** (or **Auto**) button on the Blackmagic ATEM.

This moves the Mediasonic **Preview** display to **Program** on the Multiview display.

✔ Adjust the sound volume using the appropriate input on the Sound Board.

The Blackmagic ATEM *Program* output is sent to the *Projector*.

Project the V800 Display

✔ Send the desired display to **Program** on the *V800*.

✔ To send the *V800* display to the **Program** output of the ATEM, press the appropriate switch (#5) on the Blackmagic ATEM.

This will send it to *Preview* on the Multiview monitor.

✔ Press the **Cut** (or **Auto**) button on the Blackmagic ATEM.

This moves the Mediasonic *Preview* display to *Program* on the Multiview display.

✔ Adjust the sound volume using the appropriate input on the Sound Board.

The Blackmagic ATEM *Program* output is sent to the *Projector*.
